2. MEDITERRANEAN  
SCIENTIFIC RESEARCH AND  
INNOVATION CONGRESS

30-31 JULY 2022

**KKTC-Girne**  
CONGRESS PROGRAM

**Join Zoom Meeting:**

Meeting ID: **882 1794 3086**

Passcode: **002110**

[Join Zoom Meeting](#)

<https://us02web.zoom.us/j/88217943086?pwd=UVpJdjBacnJUU2ZkeUdLV3VLZ0xOZz09>

**PARTICIPATING COUNTRIES**

**Algeria/Australia/Azerbaijan/Canada/China/Ethiopia/Fransa/Georgia/  
India/Indonesia/Iran/Kazakhstan  
Lithuania/Moldova/Morocco/Nigeria/Pakistan/Palestine/Romania/Russia/Vietnam**

**TOTAL NUMBER OF INTERNATIONAL PAPER: 129**

**PAPER FROM TURKEY: 123**

### **Önemli, Dikkatle Okuyunuz Lütfen**

- ❖ Kongremizde Yazım Kurallarına uygun gönderilmiş ve bilim kurulundan geçen bildirimler için online (video konferans sistemi üzerinden) sunum imkanı sağlanmıştır.
- ❖ Online sunum yapabilmek için <https://zoom.us/join> sitesi üzerinden giriş yaparak “Meeting ID or Personal Link Name” yerine ID numarasını girerek oturuma katılabilirsiniz.
- ❖ Zoom uygulaması ücretsizdir ve hesap oluşturmaya gerek yoktur.
- ❖ Zoom uygulaması kaydolmadan kullanılabilir.
- ❖ Uygulama tablet, telefon ve PC’lerde çalışıyor.
- ❖ Her oturumdaki sunucular, sunum saatinden 5 dk öncesinde oturuma bağlanmış olmaları gerekmektedir.
- ❖ Tüm kongre katılımcıları canlı bağlanarak tüm oturumları dinleyebilir.
- ❖ Moderatör – oturumdaki sunum ve bilimsel tartışma (soru-cevap) kısmından sorumludur.

#### **Dikkat Edilmesi Gerekenler- TEKNİK BİLGİLER**

- ◆ Bilgisayarınızda mikrofon olduğuna ve çalıştığına emin olun.
- ◆ Zoom'da ekran paylaşma özelliğine kullanabilmelisiniz.
- ◆ Katılım belgeleri kongre sonunda tarafınıza pdf olarak gönderilecektir
- ◆ Kongre programında yer ve saat değişikliği gibi talepler dikkate alınmayacaktır

#### **IMPORTANT, PLEASE READ CAREFULLY**

- ❖ To be able to attend a meeting online, login via <https://zoom.us/join> site, enter ID “Meeting ID or Personal Link Name” and solidify the session.
- ❖ The Zoom application is free and no need to create an account.
- ❖ The Zoom application can be used without registration.
- ❖ The application works on tablets, phones and PCs.
- ❖ The participant must be connected to the session 5 minutes before the presentation time.
- ❖ All congress participants can connect live and listen to all sessions.
- ❖ Moderator is responsible for the presentation and scientific discussion (question-answer) section of the session.

#### **Points to Take into Consideration - TECHNICAL INFORMATION**

- ◆ Make sure your computer has a microphone and is working.
- ◆ You should be able to use screen sharing feature in Zoom.
- ◆ Attendance certificates will be sent to you as pdf at the end of the congress.
- ◆ Requests such as change of place and time will not be taken into consideration in the congress program.

**ÖNEMLİ NOT: SUNUMLARINIZI HEM TÜRKÇE HEM İNGİLİZCE HAZIRLAMANIZI RİCA EDERİZ.**

**Algeria/Azerbaijan/Canada/Fransa/Filipinler/India/Indonesia/ Kenya/KKTC/ Malaysia/  
Morocco/Nigeria/Pakistan/Palestine/Romania/South Africa/ Saudi Arabia/Ukraine/Uzbekistan/Vietnam**

**TOTAL NUMBER OF INTERNATIONAL PAPER: 129**  
**PAPER FROM TURKEY: 123**

### **Önemli, Dikkatle Okuyunuz Lütfen**

- ❖ Kongremizde Yazım Kurallarına uygun gönderilmiş ve bilim kurulundan geçen bildiriler için online (video konferans sistemi üzerinden) sunum imkanı sağlanmıştır.
- ❖ Online sunum yapabilmek için <https://zoom.us/join> sitesi üzerinden giriş yaparak “Meeting ID or Personal Link Name” yerine ID numarasını girerek oturuma katılabilirsiniz.
- ❖ Zoom uygulaması ücretsizdir ve hesap oluşturmaya gerek yoktur.
- ❖ Zoom uygulaması kaydolmadan kullanılabilir.
- ❖ Uygulama tablet, telefon ve PC’lerde çalışıyor.
- ❖ Her oturumdaki sunucular, sunum saatinden 5 dk öncesinde oturuma bağlanmış olmaları gerekmektedir.
- ❖ Tüm kongre katılımcıları canlı bağlanarak tüm oturumları dinleyebilir.
- ❖ Moderatör – oturumdaki sunum ve bilimsel tartışma (soru-cevap) kısmından sorumludur.
- ❖

### **Dikkat Edilmesi Gerekenler- TEKNİK BİLGİLER**

- ◆ Bilgisayarınızda mikrofon olduğuna ve çalıştığına emin olun.
- ◆ Zoom'da ekran paylaşma özelliğine kullanabilmelisiniz.
- ◆ Katılım belgeleri kongre sonunda tarafınıza pdf olarak gönderilecektir
- ◆ Kongre programında yer ve saat değişikliği gibi talepler dikkate alınmayacaktır

### **IMPORTANT, PLEASE READ CAREFULLY**

- ❖ To be able to attend a meeting online, login via <https://zoom.us/join> site, enter ID “Meeting ID or Personal Link Name” and solidify the session.
- ❖ The Zoom application is free and no need to create an account.
- ❖ The Zoom application can be used without registration.
- ❖ The application works on tablets, phones and PCs.
- ❖ The participant must be connected to the session 5 minutes before the presentation time.
- ❖ All congress participants can connect live and listen to all sessions.
- ❖ Moderator is responsible for the presentation and scientific discussion (question-answer) section of the session.

### **Points to Take into Consideration - TECHNICAL INFORMATION**

- ◆ Make sure your computer has a microphone and is working.
- ◆ You should be able to use screen sharing feature in Zoom.
- ◆ Attendance certificates will be sent to you as pdf at the end of the congress.
- ◆ Requests such as change of place and time will not be taken into consideration in the congress program.

**ÖNEMLİ NOT: SUNUMLARINIZI HEM TÜRKÇE HEM İNGİLİZCE HAZIRLAMANIZI RİCA EDERİZ.**

31.07.2022

SUNDAY/ 11:00-13:30

## Experimental Results

It was carried out using the "Malaria Cell Images" dataset available on Kaggle. When the results obtained were evaluated, it was observed that the precision, recall and F-measure values were 0.96, 0.96 and 0.96. In the system trained with 5-fold cross validation, the training success was 100% and the validation success was 96%.

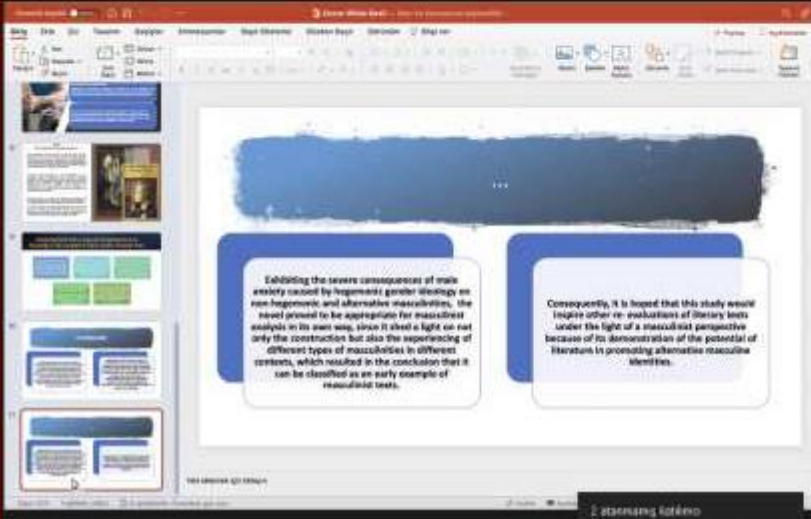

Model	Accuracy	Precision	Recall	F1-Score
Model 1	0.96	0.96	0.96	0.96
Model 2	0.96	0.96	0.96	0.96

## Materials and Experimental Procedure

5

- ◆ Samples used in this study are three different AISI S500MC, S690QL and S960QL with same geometry.
- ◆ Gas Metal Arc Welding (GMAW) has been used, and welding station, we used ESAB MG 5002CW.
- ◆ An analogy watch for distortion measurement and ZEISS AXIO OBSERVER Z1M optical microscope for microstructure changes check.

### Aim;

- Generation of lead anti-gliadin specific antibodies to use in ELISA for safe analysis of gluten free food.
- Gluten is composed of two types of proteins; **gliadin** (50%) and **glutenin** (50%).
- **Gliadin** detected as the **causative agent** of autoimmune Celiac Disease .
- The only therapy for CD is to restrain from gluten containing food.

Işın N. Geren

### ABSTRACT

Marketing channels have an important role in the crab trade system. The purpose of this study is to examine the marketing channels of crabs in the east coast of Lampung Province, Indonesia. Collecting data through interviews using questionnaires and observation. Determination of respondents using purposive sampling method. Then, the collected data is analyzed descriptively to explain the small crab marketing channels in the area. The results show that there are several marketing channels that could basically be categorized into two groups, namely the first: the small crab marketing channel with the final product in the form of pasteurization / cans involving the crab processing unit, the second: the crab marketing channel that is received by consumers in fresh condition, without going through the canning process in the crab processing unit. In this case, the most profitable marketing channel for fishermen to pasteurized crabs is the channel from fishermen - crab processing units - agents of exporters - overseas consumers. Furthermore, the most profitable marketing channel for fishermen for crabs in fresh condition is the channel from fishermen-local markets-local consumers. Therefore, to increase fishermen's profits, it is necessary to optimize the role of KUB (Kelompok Usaha Bersama / Joint Business Group) in order to strengthen the bargaining position of fisherman members in marketing crabs.

**Keywords :** crabs, trade systems, channels, fishermen, collectors, miniplants, crab processing units

### 1. PRELIMINARY

Crayfish (*Portunus pelagicus*) is the leading export commodity of fishery products after shrimp and squid in Lampung Province. The catch of crabs from Lampung Province, Indonesia nationally ranks in second place after North Sumatra Province, with a volume of 8,081 tons or Rp. 186.03 billion (KKP, 2016). 2014). This shows that the availability of crab resources in Lampung Province, Indonesia is quite good for the crab fishing community.

The business activity of catching crabs in the east coast of Lampung Province is the main source of livelihood for the fishing community. Administratively, the east coast of Lampung Province is in the working area unit of WPP 712, but ecologically the crab fishing area in Lampung is spread to the south, such as to Hurun Bay in Pesawaran Regency. This shows that the dynamics of the fishing community's crab catching activity in the east coast area have a close relationship with the crab catching activity in the working area unit of WPP 572 covering the southern and western coastal areas of Lampung Province.

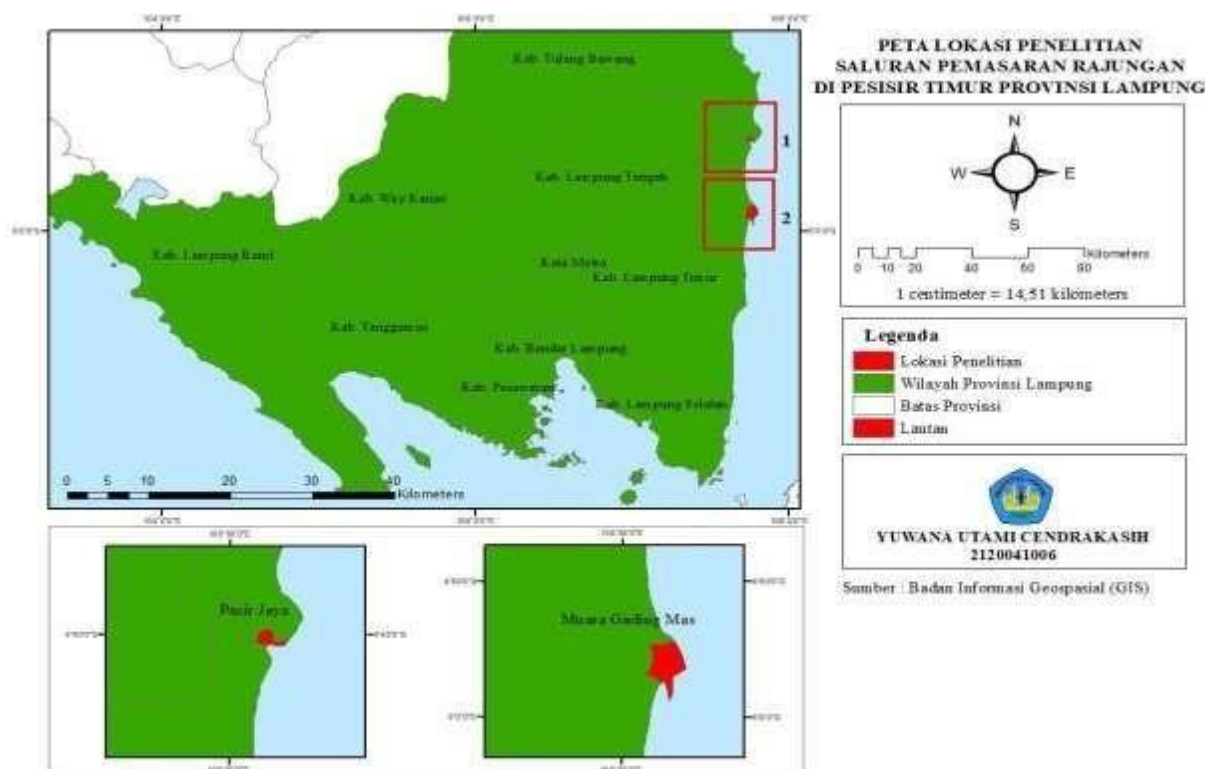

The crab trading system or trading system involves not only local business actors, but also business actors outside Lampung Province. Business actors such as collector traders, small-scale businesses in the form of miniplants and crab processing units have an important role in the crab trade in Lampung Province. The structure of the crab trade will distribute the crab catches from fishermen to consumers and the export market.

Information on the crab trade system in the east coast of Lampung is very important to be able to know the marketing flow of crabs starting from fishermen, collectors, miniplants, crab processing units; types, sizes and marketing flows of crabs in the east coast of Lampung Province. Therefore, it is necessary to conduct research related to the marketing channels of crabs on the east coast of Lampung Province to determine the marketing of crabs in the eastern region of Lampung Province.

## **2. RESEARCH AND FINDINGS**

### **2.1. Research Studies**

The research was conducted in the eastern and southern coastal areas of Lampung Province, Indonesia, which consisted of marketing centers and crab processing centers spread over two districts, namely East Lampung Regency and Tulang Bawang Regency. The research activity was carried out for four months from January 2022 to April 2022. The following is a map of the research location which includes fish marketing and processing centers in Lampung Province.

**Figure 2.1.** Map of Locations for Crayfish Research in Lampung Province

Collecting data through interviews using questionnaires and field observations. The determination of respondents in this study was carried out by purposive sampling method with the following number of respondents: 40 fishermen, 20 traders, 5 miniplants and 2 small crab processing industries. The data collected was then analyzed descriptively to explain the marketing channels for crabs on the east coast of Lampung.

## 2.2. Research result

Based on the results of the research conducted, it is found that the crab marketing system was formed by a complex pattern of activities from various individuals and groups, some of which were the main actors with different roles and functions, starting from fishermen, collector traders, miniplant entrepreneurs, and unit entrepreneurs. processing, and small crab export and import entrepreneurs.

**The following are actors who play a role in crab marketing.**

- a. Crab fishermen are the main producers of crabs. Pamuji et al., (2018) said that fishermen have an important role in collecting the catch of crabs caught in the wild to be then distributed to consumers, either directly or through several marketing channels such as collectors or miniplants.
- b. Collector traders are parties who buy crabs from producers (fishermen). Collector traders have a role as distributors between fishermen and buyers (consumers) (Agustina et al., 2014).
- c. Miniplant entrepreneurs are marketing institutions that are active in buying fresh crabs or cooked crabs (which have been steamed) from collecting traders to be sold to exporting companies in the form of crabs that have been peeled from their shells (in the form of

meat) (Jumiati et al., 2012).

d. Processing unit entrepreneurs (UPR) are crab processing actors who process crab raw materials into canned crabs (pasteurization) (Pamuji et al., 2018). The manager takes peeled crab raw materials from the miniplant then processed it into canned crabs and will be distributed to crab export agents.

e. Crab export and import entrepreneurs are parties that have a role in distributing crabs on an international scale. The crab marketing channel from the miniplant or crab meat collector pool will be channeled to export and import entrepreneurs to be distributed to countries as overseas consumers (Dafirudin et al., 2021).

The crab marketing system in the east coast of Lampung Province, Indonesia in general can be divided into two types, namely the conventional model and the vertical integration model.

The conventional model is characterized by mutually beneficial relationships and interactions between the main actors, namely fishermen, traders, and miniplant entrepreneurs. Meanwhile, the vertical integration model is characterized by a contractual relationship and interaction between the small crab processing unit and the miniplant. This vertical model is characterized by the intervention of the small crab processing unit company through a business management pattern, starting from the provision of whole crab commodities that are ready to be peeled by the miniplant to the process of sorting crab meat which is ready to be canned through the pasteurization process.

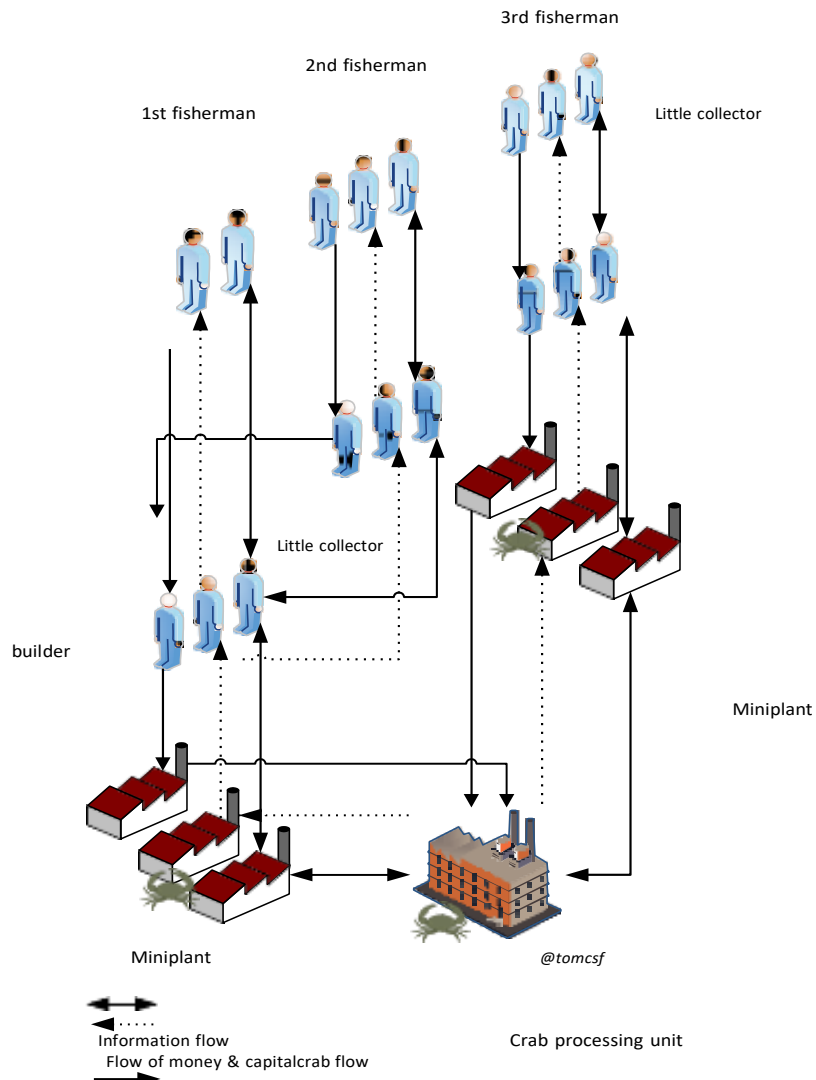

Figure 2.2. Crab marketing network and cooperation on the east coast of Lampung Province.

This conventional marketing system is carried out by fishermen, collectors or trainers, miniplants, and crab processing units (UPR). Meanwhile, vertically integrated marketing is carried out by importing small crabs from Bahrain, Tunisia, and Greece accompanied by cooperation with miniplants for the business of stripping imported crabs.

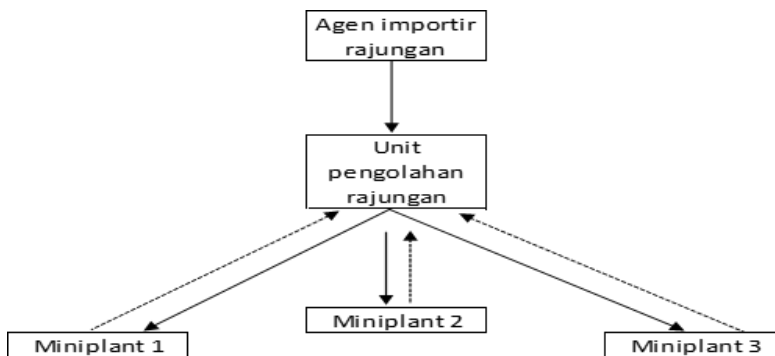

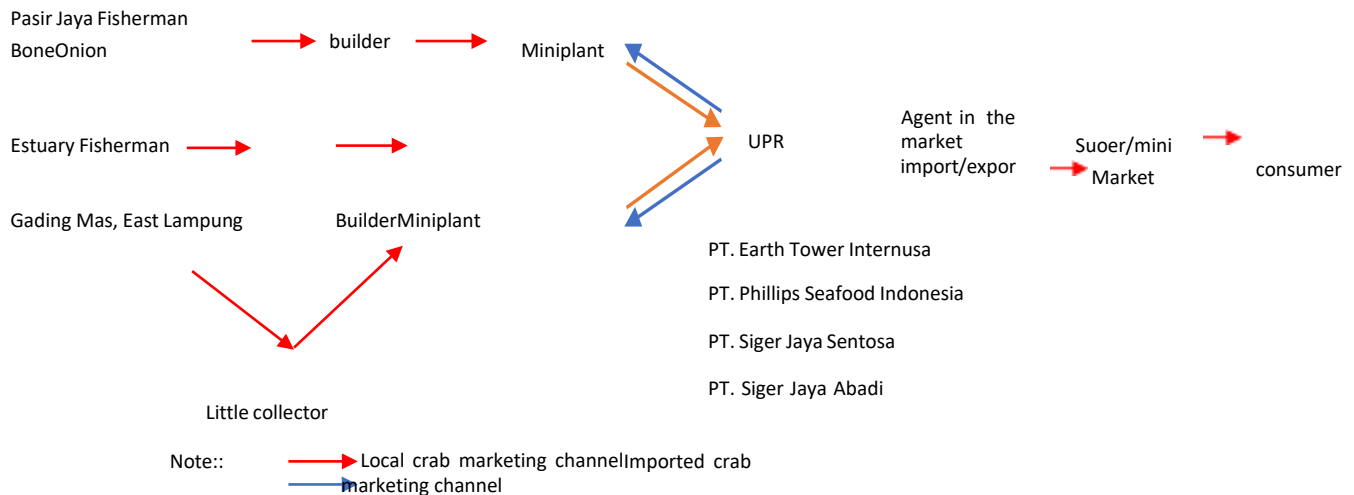

Figure 10. The vertical model of crab marketing in the Coastal area of Lampung Province

The crab marketing channel on the east coast of Lampung forms 2 marketing channels with several marketing channels or networks with the main actors consisting of fishermen, collectors or coaches, miniplant entrepreneurs, crab processing unit companies, agents in export markets, modern markets, and final consumers.

**Figure 2.3.** Crab marketing channels in Coastal Lampung Province – overseas consumers

The crab marketing channels are divided into 2 categories, namely the crab in the form of pasteurized/canned which consists of channels 1. fisherman – collector – builder – miniplant – crab processing unit – exporter agent – overseas consumers; channel 2. fisherman – miniplant – crab processing unit – exporter agent – overseas consumer; channel 3. fisherman – crab processing unit – exporter agent – foreign consumer. Then the crab channel in fresh condition consisting of channels 1. fishermen – local markets – local consumers; channel 2. fishermen – coaches – collectors – modern markets – local consumers; channel 3. fishermen – coaches – collectors – miniplants – exporter agents – overseas consumers; channel 4. fishermen – coaches – agents of exporters – overseas consumers; channel 5.

The following is an example of a marketed crab form:

**Figure 2.5. The shape of the crab in the marketing channel**

- a. Fresh crab**
- b. Boiled crab**
- c. Peeled crab**
- d. Pasteurized crab**

The distribution of crab marketing is a transportation activity, namely the process of moving commodities that follow the crab marketing channels from fishermen to consumers. There are several ways to distribute crab marketing on the coast of Lampung Province, namely using river transportation by boat; land transportation modes with three and four-wheeled motorized vehicles; and sea transportation using ships. The marketing distribution is divided into two, namely the first marketing distribution which is entirely in the Lampung Province area to the commercial port or container, namely the Panjang Port for export purposes. Then the distribution

the second is the distribution of crab marketing, some are in the Lampung Province and some are outside the Lampung Province. Some of the crabs from collectors or trainers in the Lampung area are distributed to miniplants outside Lampung, such as to Cikande Serang, Banten and to the crab processing unit PT. Manage Mina Laut in East Java and then exported to destination countries, including to the United States through the Port of Tanjung Perak in Surabaya.

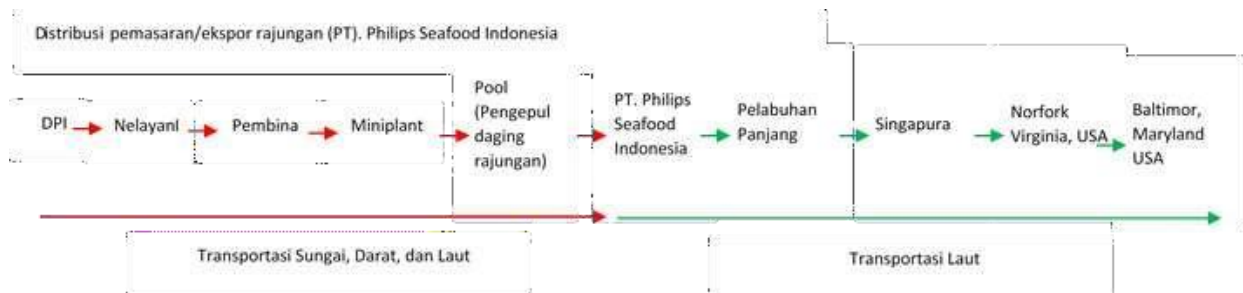

Figure 2.5. The marketing distribution of crabs whose all transactions are in the region of Lampung Province.

Figure 2.6. The distribution of crab marketing which some of the transactions are outside the province of Lampung

### 3. CONCLUSION

- The main actors in the small crab marketing channel on the east coast of Lampung consist of fishermen, collectors or builders, miniplant entrepreneurs, small crab processing unit companies, agents in the export market, and final consumers.
- The crab marketing channels are divided into 2, namely pasteurization/cans consisting of channels
  1. fishermen – collectors – miniplants – UPR – consumers; channel 2. fisherman – miniplant – UPR – exporter agent – overseas consumer; channel 3. fishermen – UPR – export agents – overseas consumers. and the second is the fresh crab channel which consists of channels
    1. fishermen – local markets – local consumers; channel 2. fisherman – builder – collector – modern market – consumer; channel 3. fishermen – coaches – collectors – miniplants – exporters – consumers; channel 4. fishermen – coaches – exporters – overseas consumers; channel 5. fishermen – traders – local markets – local consumers.
- Marketing distribution is divided into two, namely the first marketing distribution which is entirely located in the Lampung Province area to the commercial port or containers for export purposes and

the second distribution, namely the distribution of crab marketing, partly located in the Lampung Province and partly outside the Lampung Province.
